

# Cold Chain on Demand™

Cold Chain on Demand is an end-to-end delivery management service designed to guarantee the safe transfer of life-saving medicines. By combining advanced thermal technology with dedicated service oversight, the program removes the operational burden from site personnel, allowing them to focus on patient care.

## A Proven Standard of Excellence

**Operational Impact:** Four out of five participating sites report that the service is significantly easier to manage than previous transfer delivery methods.

**Service Reliability:** The program maintains a 100% satisfaction rate regarding overall performance and the consistent integrity of every delivery driving patient loyalty and building brand trust.

**Quality Performance:** High-performance packaging is validated to maintain refrigerated temperatures for over 90 hours, ensuring products arrive safely and meet the highest quality standards.

## Trusted by Healthcare Professionals

This solution is already used by more than **200 healthcare systems and pharmacies** to manage their most critical shipments. Here is what site personnel have to say about the value and peace of mind the service provides:

**On Efficiency:** “It’s the most efficient way to not have to worry about shipping supplies for pharmacy transfers. The quality exceeds our expectations, and we know our products are arriving safely.”

**On Service Value:** “We have reviewed many other products and have not found a company that provides the level of product, service, and value that AeroSafe provides.”

**On Business Impact:** “It would be very difficult to meet our business needs without the use of the AeroSafe cold chain packaging.”

## The Managed Transfer Process

AeroSafe handles the burdensome administrative and logistical tasks to ensure a seamless transfer from start to finish:

**Ready-to-Ship Packaging:** Shippers arrive preconditioned and ready for immediate use, eliminating the need for on-site refrigerator space for cooling packs.

**Integrated Labeling:** Each box includes pre-addressed, attached shipping labels for both the initial delivery and the subsequent transfer.

**Automated Scheduling:** Carrier pickups are automatically scheduled and monitored by AeroSafe agents who will intervene with the carrier when necessary

**Real-Time Status & Guidance:** Sites receive ongoing communications that offer full visibility into delivery status and clear instructions for every step of the process.
